The Imperial Gas Lamp Co.

132-134 East Lake St.

Chicago, Ill.

The "Imperial" Lamp

Fully covered by U. S. Patents.

THE Imperial Gas Lamp—because it embodies all the requisites of a **perfect light**—is worthy of investigation.

The Perfect Artificial Light

should not flicker, but should burn with a steady flame. **The "Imperial"** does not flicker and is not affected by draught or wind, but is absolutely steady from first lighting.

The Perfect Light

should burn without smoke or odor. **The "Imperial"** burns without odor and with no smoke, as the combustion is perfect. No torch is required in generating and there are no wicks to trim.

When the light is turned out it should go out at once. When **The "Imperial"** cut-off is closed it extinguishes the light **instantaneously**, thus it does not smoke the mantle.

The Perfect Light

should be simple, safe and economical. **The "Imperial" Gas Lamp** is simple in construction and is easy to operate; it is **absolutely safe**, being approved by several Boards of Fire Underwriters and it is economical. It burns common stove gasoline at a cost of about

ONE CENT PER DAY.

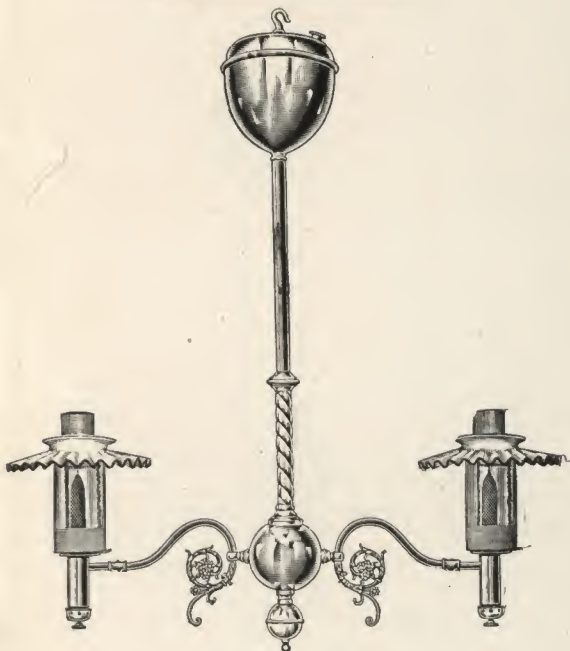

The Imperial Gas Lamp

is fully guaranteed to do all claimed, and every lamp shipped is in perfect working order. We claim for **The "Imperial" Gas Lamp** that it comes very near to the **Perfect Light**, and we make no claims that will not be established on investigation.

We urge a full investigation.

The "Imperial" Lamp

Fully covered by U. S. Patents

Automatic 6-foot Spring Extension

x

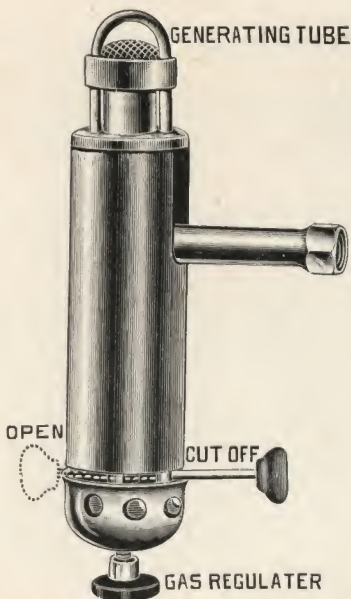

Price \$1.25 each, Net

x

This is elaborately finished in ornamental brass and should be attached to all lamps, not only on account of its being ornamental, but mainly on account of its convenience in adjusting the lamp, saving all jarring and danger of breaking mantles.

The "Imperial" Lamp

Fully covered by U. S. Patents

THE Imperial Gas Lamp burner is covered by U. S. Patents, so that it is the only burner, where the generating tube is in the centre of the flame—the advantage of this is evident, as the gas being thus superheated, gives—when mixed with air—perfect combustion, a greater candle power and no smoke, nor odor. The light will not be unsteady. The Cut-off is also a great improvement, because when closed the light is extinguished instantly. It works easy, no force being required in opening or closing, hence no jar to break the mantle. This burner does not clog.

Carefully investigate this Burner.

Directions for using Lamp

IN screwing on font and in making all joints use common brown soap. See that Wire Gauze at top of burner is properly down to its place and is always kept clean. You will find on box containing Mantle directions for putting Mantle on Gallery and burning off coating.

Do Not

Attempt to fill lamp when lighted, or where there are other lights, as it is unsafe to do so.

To Fill Lamp

See that the Cut-off is closed tight, then remove Filler Cap. Fill Reservoir nearly full of best stove Gasoline, replace Filler Cap. It is advisable to strain the gasoline through a piece of flannel, which clears it of all foreign substance.

To Light Lamp

Put some Wood Alcohol in the small oil can furnished and insert one teaspoonful in generating cup; light it, and as soon as burned out open Cut-off by pushing button to left, use no force, and light gas by applying match, holding same about two inches above top of chimney. Flow of gas is regulated by operating valve under burner, turning button to the right or left. When you first light the lamp, turn down low, then gradually turn the button to the left until proper incandescence is obtained.

To Extinguish Light

Close Cut-off by pushing button to right as far as it will go, but use no force, and the light will go out instantly. Do not use Needle Valve for this purpose. Never close Needle Valve tight; it should always remain open.

Be careful to use clean cans for gasoline, as those used for kerosene and oils will not do. Use a good quality of stove gasoline.

The "Imperial" Lamp has been approved by the Board of Fire Insurance Underwriters.

We sell handsome Extensions to be fastened to a hook in the ceiling, which will enable you to fill lamp without the trouble of taking down the fixture, and avoiding danger of breaking mantle.

The "Imperial" Lamp

Fully covered by U. S. Patents

Price List of Mantles, Globes, etc.

WE HAVE manufactured especially for The Imperial Gas Lamp, an extra strong and durable mantle, **The Imperial**, which we guarantee to be the most satisfactory gasoline mantle on the market. It is poor economy to use a cheap mantle, as so much of the brilliancy of the light depends upon the quality of the mantle and you cannot obtain proper incandescence with a cheap mantle.

Showing Mantle Correctly Placed.

Great care should be used in handling mantles, as they are frail, and sudden jar or rough handling will break them. Follow directions on box containing mantles and handle always with care.

We sell only the best obtainable make of mantles.

The "Imperial" Lamp

Fully covered by U. S. Patents

The Imperial Gas Lamp is fully guaranteed by us to do all we claim for it. We carefully inspect all lamps, and they are tested by actual burning, so that we know positively every lamp is in perfect working order when packed by us. Packed with each lamp is a sheet of directions and if these are followed a good light is assured.

We make all our deliveries F. O. B. cars, and all goods are carefully packed and shipped at buyers risk. We make no charge for packing on orders for a half dozen lamps and upwards unless it is required that each lamp be packed singly and in that event we should charge 25 cents per lamp. On orders for less quantity than half dozen, and on small orders for supplies, customers should include 25 cents for boxing.

When goods are ordered C. O. D. or subject to sight draft, it is necessary that 25 per cent. of the amount accompany the order, as an evidence of good faith.

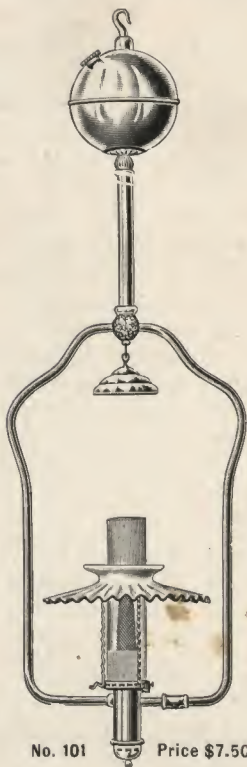

All lamps are trimmed complete with mantle, mica chimney and corrugated shade.

The Imperial Gas Lamp will certainly satisfy you, if you desire the best. Lamps are never sent out on approval, or on trial.

We Guarantee Every Lamp.
